General-purpose anticorrosive zinc phosphate pigmented primer

Product at a glance

Two component amine cured epoxy

Zinc phosphate pigmented

High volume solids 73%

Wide DFT range: 60-250 μm

Fast drying: touch dry 2h @10°C

Colours

Red

Medium Grey

Light Grey

Summary of product characteristics:

- General-purpose anticorrosive zinc phosphate pigmented primer
- Designed for new construction where short dry to handle and over coating times are required
- Quick drying properties provide fast recoating schedules and handling of painted structures
- A DFT range of 60-250 microns will meet a wide range of client requirements
- Good spreading rate
- High solids and low VOC reduces the environmental impact
- Easy application with airless spray
- Overcoating with various primers and topcoats
- Approved primer for SteelMaster intumescent thin film coatings
- Available in 20 ltr cans, 200 ltr barrels and IBCs (made-to-order)
